PROFILE SUMMARY

Senior Software Engineer with 5+ years of experience in automating business processes, data engineering, and full-stack system integration. Specializes in building scalable solutions using Golang, Python, R, and DevOps tools (S3, Docker, Kafka). Adept at data analysis, machine learning, and dashboard visualization for business insights. Proven track record in international teams (English communication) and end-to-end project ownership

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Software Country | 2022 – Present

- Led end-to-end development of a new project (Golang/Python) for automating business processes, including data collection (Drupal) and storage (S3).
- Increased system efficiency by 30% through optimization of data pipelines and visualization dashboards.
- Built real-time data processing workflows using R, DVC, and S3; integrated machine learning models for predictive analytics.
- Collaborated with an international team (English) to deliver cross-functional features and maintain CI/CD (DevOps).
- Tech Stack: Golang, Python, R, S3, Drupal, Domino, Docker, Kafka.

Programmer Analyst

X5 Retail Group | 2021 – 2022

- Engineered real-time data pipelines for mobile apps using Kafka and ClickHouse, reducing latency by 40%.
- Developed business dashboards (R/SQL) to track KPIs, improving decision-making for retail operations.
- Automated data workflows via AWX/cron, reducing manual effort by 25%.
- Tech Stack: R, SQL, Kafka, ClickHouse, AWX.

Engineer (Bridge Load Modeling)

Stroyexpertiza | 2020 – 2021

- Designed mathematical models (Python) for bridge load simulations, improving accuracy by 35%.
- Developed a Qt-based frontend for engineers to visualize stress-test results.

Work Arrangements

- Flexible Engagement: Available for full-time, part-time, or project-based work (remote).
- Contractor Option: Can be hired directly or through my Armenia-registered organization (simplifying international contracts and payments).
